SKILLS

Web Development:

HTML, CSS, JavaScript, React, Bootstrap, Basic Backend Integration

DevOps & Automation:

Jenkins, Docker, Docker Swarm, Linux, VirtualBox, Prometheus, Grafana, CI/CD

Software Development:

C++, Python, MySQL Database Design

Game Development:

C#, Python, Unity / Unreal Engine, Blender

Generative AI:

GenAI fundamentals, prompt engineering, applied GenAI concepts (Aspire Pakistan)

Video Editing:

Filmora

E-Commerce:

Amazon FBA, Dropshipping, Online Arbitrage, Private Label, Shopify Dropshipping

FARRUKH AHMAD

Computer Science Student | Web & Software Developer

Computer Science student with a broad and versatile skill set across web development, software engineering, and game development. Comfortable turning ideas into working products — from responsive interfaces to interactive games built in Unity and Unreal Engine. A fast learner who enjoys solving real-world problems and picking up new tools and technologies.

EXPERIENCE

Feb 2026 – Mar 2026

Software Development Intern — Karachi Development Authority (KDA)

- Contributed to software development tasks within a government organization, applying core software engineering and project management practices.
- Collaborated with the development team on real-world software solutions.

Nov 2025 – Dec 2025

Frontend Development Intern — DevHub Corporation

- Built responsive, mobile-friendly web pages using HTML, CSS, JavaScript, React, and Bootstrap.
- Ensured consistent design and mobile responsiveness across multiple stacks and devices.

Jul 2025 – Sep 2025

DevOps & Automation Intern — Software Productivity Strategists

- Built CI/CD pipelines using Jenkins; containerized apps with Docker and Docker Swarm.
- Set up monitoring dashboards using Prometheus and Grafana on Linux/VirtualBox environments.

EDUCATION

2023 – Present

Bachelor of Computer Science (Specialization in Gaming & Animation) — NED University of Engineering and Technology

2021 – 2023

FSc Pre-Engineering — Govt. Degree College Malir Cantt

CERTIFICATES

- Generative AI — Aspire Pakistan (Certificate)
- Frontend Development — Meta (Coursera) – Ongoing
- Introduction to Web Development — Coursera – Ongoing
- Data Science — Codanics – Ongoing

PROJECTS

- Harsh Dune (Unity) — 3-level 3D open-world game.
- 3D Fighting Game (Unity) — combo attacks with physics-based combat.
- Ragdoll Fighting Game (Unreal Engine) — custom Blender assets.
- Tiptoe Thief — Game Jam entry, 5th place, sound-masking stealth mechanics.
- Pit Stop (Unity VR) — VR pit-crew tire-change simulation.
- Employee Task Management System — full-stack web app.
- Bank Management System & Sorting Algorithm Visualizer (C++).
- ITVE Frontend Website Redesign — Built a responsive frontend redesign for a technical & vocational education institute using HTML5, Tailwind CSS, and Vanilla JavaScript; implemented scroll-snap section navigation with Intersection Observer for auto-updating nav indicators (ITVE Frontend Development Assessment).
- Freeze and Smash Game — Built an interactive game using Python, OpenCV, and Matplotlib, combining real-time computer vision with game logic and visualization.
